

Fortelus

Investment company Fortelus required Think to create a new workspace incorporating both open plan office space / executive office, meeting areas and a reception area with a real welcome or 'wow' feeling to it.

We first initiated some layout ideas in various shades using solid wood / glass and white finishes. The drawing concepts were then rendered into accurate visuals with the final scheme looking just how the client wished.

The project included full furniture packages.

Interior fit out including new partitions / solid floor and carpeted areas / data and electrics.
